The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy

measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

The Basics of Public Budgeting and Financial Management brings budgetary theory and practice together, filling the void between the two that has existed in the field of budgeting and public finance. This book bridges the gap by providing students with applications and exercises that reinforce budgetary theory. These exercises are the key to ensuring that students leave the classroom with knowledge and marketable skills. Specifically, students will be exposed to basic budget and finance concepts, but more importantly they will complete assignments where they apply the information in various settings. For example: creating tax structures, conducting a financial management plan, risk assessments, cost benefit analysis, and so on. This handbook also shows students how to best utilize tools that allow them to visually display budgets and other budgetary data. Students will gain the solid foundation needed to begin work in a budget office. While the original purpose of the book is the same, the third edition of the book provides a few new thematic sections as well as homework questions and classroom assignments that reinforce the topical areas. The ancillary materials make the process very easy for an instructor to organize their lectures around thematic areas. The book is a must read for instructor's who are considering a course that introduces students to budgeting and finance and those who want student's to learn the basic components of budgeting and financial management.
