contexts of the Victorian novel, this book explores all the major writers and their subsequent afterlives.

With the character of the doctor as her subject, Tabitha Sparks follows the decline of the marriage plot in the Victorian novel. As Victorians came to terms with the scientific revolution in medicine of the mid-to-late nineteenth century, the novel's progressive distance from the conventions of the marriage plot can be indexed through a rising identification of the doctor with scientific empiricism. A narrative's stance towards scientific reason, Sparks argues, is revealed by the fictional doctor's relationship to the marriage plot. Thus, novels that feature romantic doctors almost invariably deny the authority of empiricism, as is the case in George MacDonald's *Adela Cathcart*. In contrast, works such as Wilkie Collins's *Heart and Science*, which highlight clinically minded or even sinister doctors, uphold the determining logic of science and, in turn, threaten the novel's romantic plot. By focusing on the figure of the doctor rather than on a scientific theme or medical field, Sparks emulates the Victorian novel's personalization of tropes and belief systems, using the realism associated with the doctor to chart the sustainability of the Victorian novel's central imaginative structure, the marriage plot. As the doctors Sparks examines increasingly stand in for the encroachment of empirical knowledge on a morally formulated artistic genre, their alienation from the marriage plot and its interrelated decline succinctly herald the end of the Victorian era and the beginning of Modernism.

This inspiring survey challenges conventional ways of viewing the Victorian novel. Provides time maps and overviews of historical and social contexts. Considers the relationship between the Victorian novel and historical, religious and bibliographic writing. Features short biographies of over forty Victorian authors, including Wilkie Collins, Charles Dickens, George Eliot, and Robert Louis Stevenson. Offers close readings of over 30 key texts, among

them Charlotte Brontë's *Jane Eyre* (1847) and Bram Stoker's *Dracula* (1897), as well as key presences, such as John Bunyan's *Pilgrim's Progress* (Pt 1, 1676, Pt 2, 1684). Also covers topics such as colonialism, scientific speculation, the psychic and the supernatural, and working class reading.

Pondering the town he had invented in his novels, Anthony Trollope had 'so realised the place, and the people, and the facts' of Basset that 'the pavement of the city ways are familiar to my footsteps'. After his novels end, William Thackeray wonders where his characters now live, and misses their conversation. How can we understand the novel as a form of artificial reality? Timothy Gao proposes a history of virtual realities, stemming from the imaginary worlds created by novelists like Trollope, Thackeray, Charlotte Brontë, and Charles Dickens. Departing from established historical or didactic understandings of Victorian fiction, *Virtual Play and the Victorian Novel* recovers the period's fascination with imagined places, people, and facts. This text provides a short history of virtual experiences in literature, four studies of major novelists, and an innovative approach for scholars and students to interpret realist fictions and fictional realities from before the digital age. This title is also available as Open Access on Cambridge Core.

Taking as his point of departure the competing uses of the critical term the materiality of writing, Daniel Hack turns to the past in this provocative new book to recover the ways in which the multiple aspects of writing now conjured by that term were represented and related to one another in the mid-nineteenth century. Diverging from much contemporary criticism, he argues that attention to the writing's material components and contexts does not by itself constitute reading against the grain. On the contrary, the Victorian discourse on authorship and the novels Hack discusses—including

works by Thackeray, Dickens, Collins, and Eliot—actively investigate the significance and mutual relevance of the written word or printed word ' s physicality, the exchange of texts for money, the workings of signification, and the corporeality of writers, readers, and characters. Hack shows how these investigations, which involve positioning the novel in relation to such widely denigrated forms of writing as the advertisement and the begging letter, bring into play such basic novelistic properties as sympathetic identification, narrative authority, and fictionality itself. Combining formalist and historicist critical methods in innovative fashion, Hack changes the way we think about the Victorian novel's simultaneous status as text, book, and commodity.
