Five Kingdoms explore the order of life. Margulis and Schwartz describe it as "a catalog of the world's living diversity." It is a vividly descriptive assortment of selected examples from the Five Kingdoms of life formulated by R.H. Whittaker. The authors stress how much new knowledge, particularly in the study of unicellular life forms, has been gained in recent years.

Five Kingdoms of Nature The concept of the 5 Kingdoms of Nature is inspired by the work of Prof. Dr. Lynn Margulis in her milestone reference work "The 5 Kingdoms of Nature." The name kingdom is scientifically very much accepted, though some prefer to talk about domains as to make this more gender neutral.
