A Publishers Weekly Best Book of the Year: In a dystopian future New York, a girl's diary chronicles her life as society begins to crumble around her. Until recently, Lola Hart's biggest problem was her annoying little sister. Now the twelve-year-old girl's once comfortable life is slowly falling apart. Her mother is a teacher, but she's lost her job. Her father is a writer, but no one is buying his scripts. It's gotten so bad that they can no longer afford their Manhattan apartment or the tuition for Lola's exclusive private school. They move to a small apartment near Harlem, and Lola enrolls in public school—but the Harts aren't alone in their troubles. Riots, fires, TB outbreaks,

roaming gangs, and civil unrest have become commonplace, threatening the very fabric of life in New York. In the pages of her diary, Lola documents her family's attempts to adjust as the city and the country spin out of control. Jack Womack, a winner of the Philip K. Dick Award, has been compared to both William Gibson and Kurt Vonnegut for his vivid prose and unbridled imagination. In this novel, "Womack's stark vision of the United States's decline is an uncompromising satire that, perhaps even more than it did in the mid-1990s, forces us to confront a world instantly recognizable as our own" (Los Angeles Review of Books). "A heartrending coming-of-age story. Flecked with black humor, this is speculative fiction at its eerie best." —Entertainment Weekly

Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and

security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

In a modern mega-city built around dragons, one boy gets caught up in the world of underground dragon battles and a high-stakes gang war that could tear his family apart. Once, dragons nearly drove themselves to extinction. But in the

city of Drakopolis, humans domesticated them centuries ago. Now dragons haul the city's cargo, taxi its bustling people between skyscrapers, and advertise its wares in bright, neon displays. Most famously of all, the dragons battle. Different breeds take to the skies in nighttime bouts between the infamous kins—criminal gangs who rule through violence and intimidation. Abel has always loved dragons, but after a disastrous showing in his dragon rider's exam, he's destined never to fly one himself. All that changes the night his sister appears at his window, entrusting him with a secret...and a stolen dragon. Turns out, his big sister is a dragon thief! Too bad his older brother is a rising star in Drakopolis law enforcement... To protect his friends and his family, Abel must partner with the stolen

beast, riding in kin battles and keeping more secrets than a dragon has scales. When everyone wants him fighting on their side, can Abel figure out what's worth fighting for?

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film Blade Runner By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial

humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the world."—John Brunner "A kind of pulp-fiction Kafka, a prophet."—The New York Times "[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from."—Rolling Stone
