Inventory Test Answers

The FCI is a test of conceptual understanding of Newtonian mechanics, developed from the late 1980s. It consists of 30 MCQ questions with 5 answer choices for each question and tests student understanding of conceptual understanding of velocity, acceleration and force. Many distracters in the test items embody commonsense beliefs about the nature of force and its effect on motion.

Research

The Force Concept Inventory, established by Hestenes et al. (1992) is the original and best well known concept inventory. The idea is that you use the FCI pre- and post-instruction, asking students a bunch of questions which give you a summary of their conceptual understanding of Newtonian mechanics.
