During her extensive training and in her current roles, Kadha has treated complex multi-disciplinary cases, working collaboratively with other dental specialties using traditional and contemporary techniques. This includes cases where pre-restorative orthodontics is required to facilitate placement of osseo-integrated implants.

The modern Orthodontic - Implant Interface - Events - Neoss

Orthodontics after Dental implants. While dental implants remain immobile, natural teeth maintain the capacity to move without our lives. As we get older, our teeth may begin to drift, become crowded, or overlap. So if this occurs, and realigning these teeth is a priority – is this possible when an implant is osseointegrated? The simple answer is: yes. However, certain considerations will determine how this is accomplished.

Can you still have orthodontics if you have a dental implant?

Dental implants are also made from high-quality materials. The fixture and abutment (which is screwed into the implant to support the crown) are made of titanium alloy, whilst the crown is made from porcelain or ceramic to get the natural finish of a tooth, and a denture usually of acrylic.
