ScienceDirect posted a nursing ethics case study where an end-stage prostate cancer patient, Mr. Green, confided to nursing staff about his plan to commit suicide. The patient asked the nurse to keep it a secret. The ethical problem is whether the nurse should tell the health care team members about the patient's thought without his permission.

~~Explanations of Case Studies and Scenarios~~

Crafting a nursing case study really has two major tasks.

First, you select a patient, and begin to collect history. You also set up treatment plans and collect data to determine the efficacy of the plan and then determine your recommendations. Second, you actually have to write up the final piece.
