Post-mortem toxicology of commonly-abused drugs

When interpreting post-mortem drug levels, the circumstances and timing of death must be taken into account, in addition to the autopsy findings. This is illustrated by three common scenarios from the authors' practice in which the cause of death was drug toxicity: 1. Rapid death within minutes following intravenous heroin injection. The needle and syringe are next to the body.

Post-mortem toxicology of commonly-abused drugs ...

Postmortem Toxicology of Abused Drugs considers the role of toxicology in the investigation of homicide, suicide, accident, natural death, and overdose. It gives practical insights and case reviews on conducting toxicology tests and completing toxicology reports. It explains chain of custody; specimen collection and security; sampling of blood, urine, bile, and vitreous humor; and the selection of post-mortem specimens.

features and artifacts associated with the analysis of post-mortem specimens and ?nally provides monographs on the ?ve main drug abuse classes. These monographs provide more toxicological details relevant in a postmortem setting. 2. Scope This paper reviews the current knowledge of the post-mortem toxicology of drugs of abuse and particularly

Postmortem toxicology of drugs of abuse

The toxicologic investigation typically begins with the preliminary identification of drugs or chemicals present in postmortem specimens.30-39 Confirmatory testing is then performed to conclusively identify the substance (s) present in the postmortem specimens. In a forensic laboratory, positive identification must be established by at least two independent analyses, each based on a different analytic principle.

The Toxicology Examination - Postmortem Toxicology - Drug ...

The potential for postmortem changes must be considered in all but a few drugs. Formation of new entities as well as degradation of drugs may occur, especially in putrefied corpses; in addition, body fluids and tissues may be severely affected by autolysis and putrefaction.
