using data from the MTF survey and the Youth Risk Behavior Survey (YRBS), which collected data for 1991, 1993, 1995, and 1997 on a large sample of ninth to twelfth graders. For both data sets, there are dramatic increases in the 1990s. In the MTF data, there is an increase of 7.2 percent-

Risky Behavior among Youths: An Economic Analysis

When considering risky behavior among youths, it is im- portant to avoid both opinionated moralism as to what is the right behav- ior and naive faith that sixteen-year-olds make no predictable mistakes in their choices. By identifying systematic patterns in errors that people make, behavioral economics provides just such an approach.
