that are widely spread in society, manifests various "measurement traps" implied in empirical application, summarizes four basic contradictions that economic measurement is difficult to avoid, in particular, its possible impact on the data results and empirical conclusions, and puts forward the discipline pattern and research focus of economic statistics. This book continues the critical thinking on the logic of economic measurement and is also the basis of other topics in this series. This book is suitable for the following three types of scholars, postgraduates, and senior undergraduates who are: ? willing to deepen, expand and improve the research and teaching of economic statistics theory and methodology; ? engaging in economic empirical analysis; ? willing to apply mathematical methods in the field of social economy.

This book constitutes the refereed proceedings of the Second CCF International Conference on Artificial Intelligence, CCF-ICAI 2019, held in Xuzhou, China in August, 2019. The 23 papers presented were carefully reviewed and selected from 97 submissions. The papers are organized in topical sections on deep learning, image and video processing, NLP and recommender system, machine learning algorithms, and AI applications.

This book has studied the principle, essence and development law of sharing economics. First of all, it analyzes the inevitability of sharing economics as the mainstream and determines that its research object is the social resources of the

production, gathering, exchange, use, distribution and value creation disciplines. Secondly, it defines and analyzes the connotation, scope, concept, characteristics, research hypothesis, property right attribute, constituent elements and income distribution of the sharing economics which aims to improve the efficiency of resource allocation and reduce the market transaction cost. This book is characterized by the construction of a theoretical system composed of contingency, cooperative consumption, cognitive surplus and impersonal transaction. This book provides readers with a theoretical theory of sharing economics and an important theoretical reference for innovative entrepreneurship.

This book constitutes the refereed proceedings of the 9th International Conference on Internet Multimedia Computing and Service, ICIMCS 2017, held in Qingdao, China, in August 2017. The 20 revised full papers and 28 revised short papers presented were carefully reviewed and selected from 103 submissions. The papers are organized in topical sections on multimedia information fusion, image processing and object recognition, machine learning and representation learning, multimedia retrieval, poster papers.

With respect to the interval neutrosophic Multi-Attribute Decision-Making (MADM) problems, the MADM method is developed based on some interval neutrosophic aggregation operators.
