Teaching by Principles is a widely acclaimed methodology test used in language teacher education programs around the world. In this fourth edition, Dr. H. Douglas Brown and Dr. Heekyeong Lee offer a comprehensive survey of practical language teaching options firmly anchored in current research on second language acquisition and pedagogy. Features of the Fourth Edition A comprehensive update on current issues, new research findings, and innovative classroom teaching techniques, with additional and reworked chapters to reflect this information A description and analysis of new foundational principles, including: agency, identity, languaculture, communities of practice, embodied cognition, and self-regulation Pre-reading organizers at the beginning of each chapter Frquent statistics and pedagogical "tips" in each chapter Numerous "classroom connections" to stimulate practical applications of concepts and principles End-of-chapter group activities, discussion topics, and suggested additional readings A glossary of technical terminology

In this collection of essays, a distinguished group of innovative teachers and writers describe the approaches and techniques they have incorporated into their own teaching. The articles are designed to help classroom teachers make language classes more participatory and communication oriented. Successive articles deal with the structure of interaction in large and small groups: imaginative activities for listening, speaking, reading, writing, and testing; the use of poetry, song, and drama; how to perform grammar rules rather than recite them; the special contribution of authentic materials; using audio and video as well as computer software to enhance learning, tapping the community as a resource; learning to interact in different cultural styles; and preparing the student for real-life professional use of language. Teachers of any language and teachers in training will find in this volume a wealth of original and practical ideas for the classroom.

This book provides a practical overview of the most important methods in the field. Readers are drawn into classrooms where various teaching methods and approaches are being used. They are encouraged to reflect on their own beliefs and to develop their own approach to language teaching. - Publisher.

Praise for How Learning Works "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, Tools for Teaching "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, e-Learning and the Science of Instruction; and author, Multimedia Learning
