Understanding Daily Rainfall Variability Over Tekeze River ...
The spatial variability of rainfall was estimated using a coefficient of variation (CV) over the IGB . CV is calculated by the standard deviation divided by the mean annual of rainfall over the study period. It represents a least in the region of high rainfall, whereas the largest in the region of scanty rainfall.

Rainfall variability over the Indus, Ganga, and ...
This study examined the extent of seasonal rainfall variability, drought occurrence, and the efficacy of interpolation techniques in eastern Kenya. Analyses of rainfall variability utilized rainfall anomaly index, coefficients of variance, and probability analyses. Spline, Kriging, and inverse distance weighting interpolation techniques were assessed using daily rainfall data and digital elevation model using ArcGIS.

Rainfall Variability, Drought Characterization, and ...
The rainfall variability and trends over North Shewa investigated using gauge as well as gridded rainfall data from 1985 to 2018. The variability of rainfall in both annual and seasonal scales were evaluated using coefficient of variation (CV), standardized rainfall anomaly, precipitation concentration index (PCI), and standardized precipitation index.

Understanding rainfall spatial variability in southeast ...
Our understanding of what controls rainfall variability and change is worryingly poor. Research in the group aims to provide a more solid understanding of climate processes in key rainfall regions such as southern Africa, central Africa/Congo Basin, East Africa and the Sahel. We are also strongly motivated by analysing how the climate system is represented in climate models because these are the prime tools for prediction.
