This bestselling text is a concise and balanced classic presenting the domestic health care system. It explains the five major components of the U.S. health care system: health care institutions, health care personnel, financing mechanisms, research and educational institutions that produce biomedical knowledge and health personnel, and firms producing "health commodities" (such as pharmaceutical drugs and hospital equipment). Completely updated to reflect the continual

In the most important health insurance study ever conducted researchers at the RAND Corporation devised all experiment to address two key questions in health care financing: how much more medical care will people use if it is provided free of charge, and what are the consequences for their health? For three- or five-year periods the experiment measured both use and health outcomes in populations carefully selected to be representative of both urban and rural regions throughout the United States. Participants were enrolled in a

range of insurance plans requiring different levels of copayment for medical care, from zero to 95 percent. The researchers found that in plans that reimbursed a higher proportion of the bill, patients used substantially more services - indeed, those who paid nothing used 40 percent more services than those required to pay a high deductible - but the effect on the health of the average person was negligible. In addition, participants who were assigned at random to a well-established health maintenance organization used hospitals substantially less than those in the fee-for-service system, again with no measurable effect on the health of the average person. This book collects in one place for the

Global Pirates is a critical investigation of international insurance fraud. Robert Tillman portrays the often surreal world of the burgeoning offshore insurance industry; a world in which sophisticated white-collar criminals operate beyond the reach of government regulators to set up elaborately orchestrated scams that drain illegal profits out of the \$3 trillion U.S. insurance market. He also describes how the new global economy allows these scam artists to take advantage of rapidly changing financial markets and the regulatory
