Crimes against Nature reveals the hidden history behind three of the nation's first parklands: the Adirondacks, Yellowstone, and the Grand Canyon. Focusing on conservation's impact on local inhabitants, Karl Jacoby traces the effect of criminalizing such traditional practices as hunting, fishing, foraging, and timber cutting in the newly created parks. Jacoby reassesses the nature of these "crimes" and provides a rich portrait of rural people and their relationship with the natural world in the late nineteenth and early twentieth centuries.

In *Black Sexual Politics*, one of America's most influential writers on race and gender explores how images of Black sexuality have been used to maintain the color line and how they threaten to spread a new brand of racism around the world today.

Too often pastoral care is uninformed by historical practice and is overly influenced by psychological theory and practice, according to Andrew Purves. At least one consequence of this is that it is often disaffiliated from the church's theological heritage. Purves examines Christian writers from the past who represent the classical tradition in pastoral theology--classical in the sense that they and their texts have shaped the minds and practices of pastors in enduring ways. He reflects on texts from Gregory Nazianzus, John Chrysostom, Gregory the Great, Martin Bucer, and Richard Baxter. He includes a brief biography of each author, introduces the major themes in the writer's theology, and discusses the issues arising for pastoral work.

The stories in this collection span almost one thousand years of story-telling in India. Most originate in North India and all were written by Jain monks for the edification and amusement of the faithful. The treasures of India's heritage of story-telling are known to us today mainly from these Jain stories which have been carefully preserved through the years. The Stories in *The Clever Adulteress* have been translated by a renowned group of scholars from India, North America and Europe. Each translator has chosen his or her favorites from the vast treasures of Jain literature.

With dryland areas accommodating approximately one billion people in over a hundred countries, there is obviously a problem of increased stress being placed on the natural resources of these areas, which ultimately contributes to overall land degradation. Coupled with this, many developing countries, particularly in Africa, are showing a fall in agricultural production per capita, with people migrating away from dryland areas; such relocation to marginal lands and forests or to already over-populated cities further enhances global land degradation. With this in mind, *Social Aspects of Sustainable Dryland Management* attempts to address the overall problem of land degradation and provides ways in which dryland productivity and viability can be increased and managed for future years. The volume bases its results on case studies and field research projects, and encourages a greater involvement of the local population in developing methods of management of their own natural resources. This volume therefore embodies a concept of development far beyond conventional methods. It aims to show that land management must develop around the priorities, needs and objectives of the people concerned and emphasises the need to involve local people in solving the problems of resource degradation, so that future research and modern technologies can be developed with their participation. Above all, it seeks to recognise the value of indigenous knowledge in sustainable development, so that such knowledge systems can become the starting point from which to plan management strategies and new technological adaptations.
