Writing

order of operations would call for you to multiply 5 times 4 first, then add 2.

However, our written expression asks us to multiply 5 by the sum of 4 and 2. In other words, we need to add 4 and 2 first, then multiply that number by 5.

~~Answers~~

The expression  $9 + x$  represents a value that can change. If  $x$  is 2, then the expression  $9 + x$  has a value of 11. If  $x$  is 6, then the expression has a value of 15. So  $9 + x$  is an algebraic expression. In the
